Education

Northeastern University

PhD in Computer Sciences (Specializing in Machine Learning and Network Science) - CGPA 3.98/4

Boston, MA, U.S.

Sep. 2021 - Present

Visvesvaraya Technological University

Bachelor of Engineering in Computer Sciences - CGPA 8.16/10

Bangalore, Karnataka, India

Aug. 2015 - Jun. 2019

Work Experience

Fidelity Investments

Co-op - Data Scientist - AI Center of Excellence

Boston, MA, U.S.

Jan. 2025 - Jul. 2025

- Developed a foundational graph neural network-based architecture to represent general mixed integer programs (MIPs) to enhance the efficiency of heuristic solution methods.
- Developed a foundational architecture for customer representation for use across various business units.

Akamai Technologies

Performance Engineer II - Global Performance And Operations

Bangalore, Karnataka, India

Jul. 2019 - Jul. 2021

- Optimized platform performance metrics, including throughput, content offload, and latency, leading to enhanced overall system efficiency.
- Designed and implemented systems for efficient data mining and visualization from raw log data, providing actionable insights and improved decision-making.
- Scaled and prepared the Akamai platform for critical events, such as the IPL cricket league and Apple WWDC keynote, successfully handling up to 10 Tbps of traffic in a single country.
- Mentored and guided two interns through the development of their projects and presentations, ensuring successful completion.

Akamai Technologies

Intern - Platform & Delivery

Bangalore, Karnataka, India

Jan. 2019 - May 2019

- Developed an efficient system for root cause analysis by performing correlation across multiple streams of time series data, improving the accuracy and speed of issue identification.
- Developed tools to visualize network traffic demand across the Akamai network at various levels of granularity, including by country or specific server sets, improving capacity planning and resource allocation.
